

# An unexpected journey

Evan Giles

9 Feb 2010

- ▶ My ISP allocates me a dynamic IP address
- ▶ Which changes every few weeks
- ▶ I am sick of finding I can't access my home computer
- ▶ ..and having to update my DNS records with the new address
- ▶ My DNS provider ([www.zoneedit.com](http://www.zoneedit.com)) allows dynamic updates

# But look what I found

The screenshot shows the CPAN website search results for the query "DNS Dynamic". The CPAN logo is at the top left. A navigation bar contains links: Home, Authors, Recent, News, Mirrors, FAQ, Feedback. Below the logo is a search bar with "DNS Dynamic" entered. A dropdown menu shows "In [All]" and a "CPAN Search" button. The results section shows "Results 1 - 10 of 39 Found". A list of search results follows, each with a link to the module, a brief description, and metadata like version and date. The "DNS::EasyDNS" result is highlighted with a yellow circle. At the bottom right, there is a "hosted by weblocal.ca" logo.

But look what I found

The screenshot shows the CPAN website's search results for the query "DNS Dynamic". The page has a blue header with the CPAN logo and navigation links: Home, Authors, Recent, News, Mirrors, FAQ, and Feedback. Below the header is a search bar containing "DNS Dynamic" and a dropdown menu set to "All". The results section shows "Results 21 - 30 of 39 Found". The first result is "Net::DNS::LiveDoorDomain::DDNS", which is highlighted with a yellow circle. Other visible results include "DNS::WorldWideDns", "Mail::CheckUsers", "ASNMTAP::Asnmtap::Plugins::WebTransact", "Net::DNS::ToolKit::RR::SOA", "Net::DNS::ValueDomain::DDNS", "EV", "XAO::DO::Web::Content", "dynsudp", and "Mail::Milter::Module::ConnectMatchesHostname". The page footer includes the text "131713 Uploads, 18009 Distributions, 78563 Modules, 7979 Packages" and a logo for "weblocal.ca" with the tagline "Find. Rate. Share."

# Module Summary

The screenshot shows the CPAN website interface. At the top is the CPAN logo and a navigation bar with links: Home, Authors, Recent, News, Mirrors, FAQ, Feedback. Below the navigation bar is a search box with the text "In AB" and a "CPAN Search" button. The main content area displays the module summary for "DNS-ZoneEdit-0.02" by "Evan Giles". The summary includes a "This Release" section with the version "DNS-ZoneEdit-0.02", a "Download" link, a "Browse" link, and the date "14 Dec 2009". It also lists "Other Releases" with a link to "DNS-ZoneEdit-0.01" from "07 Dec 2009" and a "Goto" button. The "Links" section contains links to the "Discussion Forum", "View/Report Bugs", "Dependencies", and "Other Tools". The "CPAN Testers" section shows a "PASS (125)" status with links to "View Reports" and "PerlPlatform Version Matrix". The "Rating" section shows a "0 Reviews" status with a link to "Rate this distribution". The "License" section is "Unknown". The "Special Files" section lists "Changes", "META.yml", "README", "MANIFEST", and "Makefile.PL". Below the summary is a "Modules" section with a table showing the module "DNS-ZoneEdit" and its description "Update your ZoneEdit dynamic DNS entries" with a version of "0.02". At the bottom right, there is a "YellowBot" logo with the text "Served by YellowBot" and "beta".

The image shows a screenshot of a Google search results page for the query "evan giles perl". The page displays several search results, including links to GitHub, LinkedIn, and CPAN. Hand-drawn in black ink are two arrows and a smiley face. One arrow points from the right towards the search results, and another points from the right towards the "ZoneEdit.pm" result. A smiley face is drawn next to the "ZoneEdit.pm" result.

gitpan

The screenshot shows the GitHub repository page for `gitpan/DNS-ZoneEdit`. At the top, the GitHub logo and navigation links are visible. The repository name is `gitpan / DNS-ZoneEdit`. Below the repository name, there are tabs for Source, Commits, Network (1), Issues (0), Downloads (1), Wiki (1), and Graphs. A search bar is also present. The main content area shows the release history of `DNS-ZoneEdit`, with a link to the release history on CPAN. A green banner promotes using GitHub for code sharing, with a "Sign up now!" button. Below the banner, the initial import of `DNS-ZoneEdit 0.02` from CPAN is detailed, showing the commit hash `ac9fe31675b2cfd11c2b092c7f3c0d950ff0` and the tree hash `dc6026bc13011ba3c2d64e40e0e5d707f9e78329f`. The commit was made by Evan Giles (author) on December 14, 2009, and committed by schwern (committer) on January 07, 2010. A table lists the files in the initial import, including `Changes`, `Makefile.PL`, `lib/`, and `t/`. The README section is also visible at the bottom.
