

Cribz Lib PHP 5 Library

Presented By: Me!!!!!!!!!!

The Line Up

- What is it?
- What does it do?
- Why do you need it?
- Who wrote it?
- Where can I find it?

No.1 Who am I

Name: Christopher Tombleson

Occupation: Programmer

Hobbies: MMA, BJJ, JUDO, Writing Code.

Description: The main man behind the madness at Cribz Network.

Website: <http://cribznetwork.com>

Blog: <http://blog.cribznetwork.com>

Github: <http://github.com/chtombleson>

What is it?

Cribz lib is a component library written in PHP.

It contains useful classes that enable you to do rapid prototyping (I hope).

What does it do?

It's a library of useful class that can be included into any project.

The classes include:

- Database class, DBA Layer based on PDO
- Template Engine, powered by regex
- Form builder
- Memcached
- Spellchecker utility
- Email utility
- Cookies
- Session
- Internationalization(i18n)
- And a couple more things

Why do you need it?

- It's handy
- It's well maintained
- It's extendable
- It's opensource
- It's written in PHP
- You can do anything with it

Who wrote it?

It was not written by Bill Gates or Steve Jobs(R.I.P).....

It was written by me, Christopher Tombleson.

Quality code and a friendly hello wait for you at Cribz Network.

Where can I find it?

It is available via github @ <http://github.com/chtombleson/cribzlib>

I'm open to any suggestions etc....

Email: chris@cribznetwork.com
